PART NUMBER T1412-10

T1412-10S

T1412-10F

PART NUMBER A4SN

Extra small tongue for miniature blocks. Most often used in wire welder handles and other similar restricted areas. 22 to 18 gauge, #4 stud.

PART NUMBER H250

A clear "see through" connector for .250 tab female push-ons. Provides complete insulation around push-on housing. May be used in either the plugged or unplugged condition due to the depth of the connector recess.

PART NUMBER B178

This pin terminal is used for connecting wires to the back of trailer connectors that have screw sockets. Commonly known as the cole hersey pin.

PART NUMBER T250X

This non-insulated flag terminal with a .250 tab size will work on wire gauges 14 to 12. Fits well on air conditioning compressors where post type hermetic connectors are a problem.

GAUGE WIRE	22 TO 18	16 TO 14	12 TO 10
PART NUMBER	AP-O	BP-O	CP-O

This crimp terminal is used for connection of wire to a set screw or socket type terminal block. Often found on Italian or German machinery.
