TEST PROBE LEAD WIRE

Stranded copper wire with a tough, but soft, rubber jacket to provide operating range to 5,000 volts. Sixty-five (65) strands of thirty-six (36) mil copper stranding are used to assure extremely flexible wire and carry ten amperes. The copper is tin plated to give protection from corrosion and oxidation.

SIZE	PART NUMBER
18 GAUGE (RED)	TPL 18R
18 GAUGE (BLACK)	TPL 18B

TRAILER CABLE

Trailer cable is made with a plastic over-all jacket. The single conductors are stranded copper, color coded for identification purposes. This is a very tough cable with good resistance to abrasion, oil, grease, acid and weather.

*STANDARD COIL 100'

SIZE	PART NUMBER
