

ALL PURPOSE TOOL

All-purpose cutter crimper handles a wide range of sizes and functions: wire cutting, screw cutting, wire stripping and crimping. Cutters and strippers are in front of the pivot for maximum ease-of-use in reaching into tight places. Tool features crimping dies for insulated and non-insulated connectors from 10 to 22 gauge, and cutters for 4-40, 5-40, 6-32, 8-32, 10-32, and 10-24 screws. Narrow, serrated plier jaws to pull, loop and bend wire. Handles designed for maximum comfort. Plastic-covered handles.

PART NUMBER 1010

WIRE STRIPPER/CUTTER

Strips six standard wire sizes without nicking wire: No. 10 through 20 AWG and 5.3 through .5 metric. Scissors action of 1/2" wide cutter makes clean cuts with little effort. Serrated nose jaws to bend, shape, or pull wire; holes for looping wire ends. Compact; only 6" long. Coil spring reduces fatigue. Comfortable plastic-covered handles.

PART NUMBER 1011

WIRE STRIPPER/CUTTER

A handy, light, compact tool for stripping insulation from wire. Convenient hole for looping or bending wire. With hold-open spring. Plastic-dipped handles.

PART NUMBER 1004

AUTOMATIC STRIPPER

A tool for stripping small diameter wires in a single movement. The wire stripper has precision ground blades which cut cleanly through the insulation.

Blades are shaped to avoid damage to the conductor. Operation is gentle enough to handle fine wires and the locking action prevents the jaws from snapping back onto the stripped wire end. Strips 18 gauge thru 10 gauge wire sizes.
